paragraph mark	^p
quote, open single curly (‘)	^0145
quote, close single curly (’)	^0146
quote, single unsexed (')	^39
quote, open double curly (“)	^0147
quote, close double curly (”)	^0148
quote, double unsexed (")	^34
registered trademark (®)	^0174
space	^32
space, nonbreaking	^s
tab character	^t
tilde (~)	^0126
trademark (™)	^0153
Unicode numbers (e.g.)	^u8211 (Unicode 8211 = en dash)

**Commented [PB1]:** You have to use ^39 in non-wildcard Find, but in wildcard Find, you can just use '.

**Commented [PB2]:** Ditto. In a wildcard Find you can just use ".
